Allen E. Paulson  
Chairman and President

*rec'd 9 May*

May 6, 1985

The Honorable William Casey  
Director  
Central Intelligence Agency  
Washington, D.C. 20505

Dear Mr. Casey:

I want to extend a personal invitation for you and appropriate members of your staff to inspect our new surveillance/reconnaissance aircraft at Washington National Airport on May 13. It will be parked at Butler Aviation all day.

We are just completing some installations for the Paris Air Show that could have particular interest for you. The LOROP camera (66" focal length) is mounted in the forward part of the cabin, adjacent to an optic window.

A side-looking synthetic aperture radar is located mid-cabin along with the operator's console for a maritime patrol radar.

A staff compartment, consisting of a four-place conference table grouping and two individual executive chairs, is located in the aft cabin immediately adjacent to a food-service gallery and lavatory. This area could serve as an airborne command post.

Mr. Casey, if you can find a few minutes in your busy schedule to inspect the SRA-1 demonstrator, I am confident you will confirm some applications to your operation. As you know, Senator Barry Goldwater has expressed strong support for the aircraft for your use.

We will call your office later this week to hopefully confirm a time for a personal showing.

Sincerely,

Allen E. Paulson

AEP/db
